Pros:

- \* Good graphics
- \* Sniper rifle still quite a bit of fun to use, similar to Fear 2.
- \* Overall a very good combat environment V system.
- \* The dual AY69 guns are freakin' awesome!
- \* Great performance V engine optimization.

Cons:

- \* Mute protagonist - kills immersion. Especially in areas where other characters are talking directly to you and asking you questions and your character just stands there.
- \* Weapons don't carry over from one interval to the next (kinda stupid) which negatively impacts immersion.
- \* Map design is somewhat poor along with the fights. You're constantly out of ammunition because it won't let you carry over gear from the previous levels, etc.
- \* Ending not very satisfying - not much in the way of closure, really.
- \* Bunch of fights with some of these big blue boss units that, IMO, were ridiculously difficult. I'm pretty good at FPS but I found the fights with them to be just insane at times which made the game very unenjoyable at those points.

Overall rating: 4.5/10
